

mini – proxSafe racx module The little key manager

deister electronic provides high-end technology for the guarding, maintenance and facility management markets.

proxSafe is an intelligent solution for the management and safe-guarding of keys and valuables in secured areas.

mini

proxSafe mini is a small key cabinet for eight keys. The proxSafe mini can be used either as a Cabinet together with the proxSafe Terminal or as a module for the proxSafe racx system.

Every key is securely attached to an electronic keyTag. This key is being locked in the proxCylinder where its code is being read contactless.

The cabinet is operated via a proxSafe user terminal. The terminal identifies the user and verifies his key assignments. On a successful authorization the proxSafe mini opens and the respective slot is being illuminated. Also for key return the slot is being illuminated in order to guide the user to the right proxCylinder.

Up to 5 proxSafe mini can be mounted into a proxSafe racx Housing 16 high, 10 proxSafe mini in a 32 high housing.

Your benefits at a glance

- **Simple system** for small quantities of keys
- **Keep track** over all handed out keys in your company in the central place
- **Automatic shutter** prevents unauthorized access
- **Electrical emergency opening**
